Pune, IN

SUMMARY

Two years of experience as a full stack developer with a focus on Next.js and React.js. Currently leading and overseeing three projects in my role as frontend developer at a seeded startup. I've also finished two personal projects, which demonstrate my commitment to lifelong learning and technological exploration. I am dedicated to improving my knowledge of technology and cloud computing. I am skilled at taking charge of projects and providing excellent solutions.

EXPERIENCE

Frontend Developer

Eight Network

2023 - Present Bangalore, IN

Eight is an audio broadcasting mobile application

- Developing and maintaining APIs with aws lambda and dynamoDB.
- Created a dynamic web player with an audio player, show listings, and a server-driven user interface that is customizable (e.g., Hero Carousel, Continue Listening), improved user experience with loading skeletons and sophisticated search capabilities.
- Created a podcasting platform that makes it simple for consumers to record and edit audio episodes. Implemented features for podcast distribution, metadata handling, and audio management have been implemented.
- Developed a platform for interactive audio streaming that let's people run their own stations and broadcast live, real-time chat, participant controls for smooth user engagement, microphone sharing, user kick and block, and many more features, and station administration tools have all been implemented.
- Created a thorough dashboard for a content management system (CMS) to enable effective processes for content creation, administration, and publication. To improve editorial operations, integrated functions for scheduling, version control, user permissions management, content editing, and analytics tracking are included.
- Developed a dynamic company homepage website featuring brand identity, services, and achievements with intuitive UI, responsive design, and interactive elements to enhance user engagement.

Web Developer

GrowMore Media
